ABOUT

Qualifications Summary: Solid foundation in computer science, with strong competencies in Data Structures, Algorithms, and Complexity Analysis. Gained strong coding skills while working on projects by following Object Oriented Design principles, using Algorithms, and Design Patterns. Adapted clean and effective coding skills while working on projects while being organized and detail oriented. Served as the Scrum Master of two projects and worked collaboratively with the project team by using Git and Agile Methodology (following Software Development lifecycles in collaboration and using best practices) while strategizing and prioritizing effectively to accomplish multiple tasks and stay calm under pressure. Production experience with Java, Android, Web applications, and relational databases (RDBMS design and querying). Implemented front-end web applications that carries a high quality user experience. Developed applications while performing Written Communication Skills
